No. ES140604014CE

KONFORM-MASTER

(The Submitted Sample Said To Be)

Sample Name : REACH
Destination : EU
Country of Origin : Others
Sample Received Date : June 04, 2014
Testing Completed Date : June 09, 2014

Test Requested : As specified by client, according to REACH Regulation (EC) No. 1907/2006, to determine the content of the one hundred and fifty-five Substances of Very High Concern (SVHC) in the submitted sample.

Test Results : Please refer to next page(s).

This Test Report is issued by the Company subject to its General Conditions of Service printed overleaf or available on request and accessible at <http://www.emtek.com.cn>. Attention is drawn to the limitations of liability, indemnification and jurisdictional policies defined therein. The results shown in this test report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. This Test Report cannot be reproduced, except in full, without prior written permission of the Company.

Remark :

1. ND = Not Detected (less than MDL) MDL = Method Detection Limit
2. PBT = Persistent, Bio accumulative and Toxic as defined in Regulation (EC) No 1907/2006
3. vPvB = Very persistent and very bio accumulative as defined in Regulation (EC) No 1907/2006
4.
 - (1) CAS No. 7789-12-0 refers to Sodium dichromate dihydrate
 - (2) CAS No. 10588-01-9 refers to anhydrous Sodium dichromate
 - (3) CAS No. 3194-55-6 refers to 1,2,5,6,9,10- hexabromocyclododecane
 - (4) CAS No. 25637-99-4 refers to hexabromocyclododecane (without specifying bromine positions)
5. If the article contains a material type whose weight is less than 0.1% of the total article weight, this material type is ignored for testing.
6. * = Result is based on the representative heavy metal concentration. Due to the limit of the analytical technology available, when the calculated result of target substance by chemometrics is higher than the request limit, the client is strongly advised to review the chemical formulation to ascertain.
7. # = The SVHC which is defined as UVCB substance (substances of **U**nknown or **V**ariable composition, **C**omplex reaction products or **B**iological materials) under REACH regulation cannot be sufficiently identified by its chemical composition as the number of constituents is relatively large and/or the composition is, to a significant part, unknown and/or the variability of composition is relatively large or poorly predictable. So the test result is calculated as per the selected identifiers of the SVHC basing on the worst-case scenario.
8. According to the REACH regulation (EC) No. 1907/2006, the request limit is 0.1% for SVHC in the article.
9. If a SVHC is found over the request limit, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by further request of quantitative analysis.

Test Method :

By using microwave digestion or solvent extraction methods, and the analysis was performed by ICP-OES, GC-MS, IC and UV.

Note :

1. The limit of 0.1% (w/w) applies to an article. The results were calculated assuming as the submitted sample was an article. However, the results may not be applicable if the intended use of the sample is a substance or mixture. According to REACH, definition of an article, substance and mixture are:
 - i. Article - An object during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition
 - ii. Substance - A chemical element and its compound in the natural state or obtained by any manufacturing process.
 - iii. Mixture (Previously known as "Preparation") - A mixture or solution composed of two or more substances
2. In accordance of Article 7 of Regulation (EC) No. 1907/2006 (REACH regulation) – Registration and notification of substances in articles, any producer or importer of articles shall notify ECHA, if a substance meets in criteria in Article 57 and is identified in accordance with Article 59(1), if both (1) the substance is present in those articles in quantities totalling over 1 tonne per producer or importer per year & (2) the substance is present in those articles above a concentration of 0.1% weight by weight (w/w) are met. The information to be notified shall include (a) identity and contact details of the producer or importer, (b) the registration numbers, (c) the identity of the substance and (d) the classification of the substance, (e) a brief description of the use of the substance and (f) the tonnage range of the substance.
3. In accordance of Article 33 of Regulation (EC) No. 1907/2006 (REACH regulation) – Duty to communicate information on substances in articles, any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance. On request by a consumer the relevant information shall be provided by any supplier of an article free of charge, within 45 days of receipt of the request.
